**PREPARATION FOR COLONOSCOPY - AFTERNOON PROCEDURE**

In order to ensure the best possible outcome with respect to your colonoscopy, it is essential that the large bowel is completely clear of waste material. If the bowel is not clear, this may have to be repeated. It will be necessary to modify your diet for a couple of days prior to colonoscopy and to take a special mixture prior to your procedure.

**Iron tablets should be stopped 5 days prior to the procedure. If you are taking any medication to thin the blood other than Aspirin or if you are a Diabetic, please ensure you advise our rooms at least 7 days prior to the procedure day.**

If you feel you have a health problem which will affect your ability to follow the directions, please contact my rooms (Ph: 07 5591 4455).
